

Keep These Points In Mind:

- For all of us, most keys we read are not in C Major. And thankfully, not in C# or C^b, as well.
- Push and challenge yourself to be very accustomed to keys other than C Major.
- Chord accompanying is an entirely separate subject; however, it is covered by a large catalog of work preceding this publication.
- Music notation for guitar is usually relative. Meaning that whatever you are reading can be interpreted at many different areas on the board.
- The Appendix, at the end of the book, features chord diagrams for any chords that might seem a bit more complex or special.

chapter twelve

Time Signatures

The top number indicates the number of beats per measure. If the top number says 5, you are going to count 5 beats per measure, i.e. 1-2-3-4-5; 1-2-3-4-5; 1-2-3-4-5; etc. If the top number indicates 2, you would count 1-2; 1-2; 1-2; etc.

The bottom number assigns the value of one(1) beat to the type of note indicated. Note key term: “type of note.” The type of note that gets the value of one beat is the only thing the bottom number indicates. Therefore, **the only numbers** that can be used for the bottom number of the time signature will be 1; 2; 4; 8; 16; and 32. These numbers represent the common types of notes in music notation.

1 = Whole note
2 = Half note
4 = Quarter note
8 = Eighth note
16 = Sixteenth note
32 = Thirty-Second note

READ ALL TEXT!

If the bottom number says 4, that means the *quarter note* is worth 1 beat. The other types of notes will then align relative value-wise with the quarter note, i.e., eighth note equals a $1/2$ beat; half note is worth 2 beats; whole note equals 4 beats. If the bottom number is 8, the *eighth note* is worth 1 beat, which then means the quarter note is 2 beats; and the half note is 4 beats.

Remember when reading a *time signature*:

- The two numbers indicate two completely different things.
- The two numbers are not to be read as a fraction.
- Per the **Time Circle Concept**: The top number of a time signature indicates how many circles you must travel through in each measure.

chapter thirteen

Sixteenth Notes

What is worth half as much as an eighth note? A *sixteenth note*. A sixteenth note has two flags along with a filled-in head and stem. This is a single sixteenth:

READ ALL TEXT!

Therefore, for every eighth note there can be two(2) sixteenth notes; for every quarter note there can be four(4) sixteenth notes; and for every half note there can be eight(8) sixteenth notes. Note the following:

this second line is one entire measure containing 16 notes within four beats

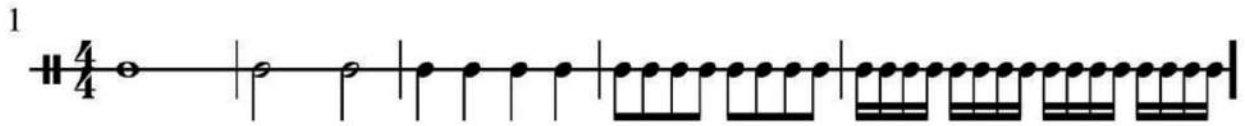

Per the **Time Circle Concept**, sixteenth-notes **and rests** are located at 6 o'clock, 9 o'clock, 12 o'clock, and 3 o'clock (6, 9, 12, 3).

Every group of four sixteenth-notes represents one circle

1. Three Sharps!

Musical notation for exercise 1, featuring three sharps (F#, C#, G#) in a 4/4 time signature. The exercise consists of two staves. The top staff contains a melody with eighth and quarter notes, including rests. The bottom staff contains a bass line with eighth and quarter notes.

2. Three Flats!

Musical notation for exercise 2, featuring three flats (Bb, Eb, Ab) in a 4/4 time signature. The exercise consists of two staves. The top staff contains a melody with eighth and quarter notes, including rests. The bottom staff contains a bass line with eighth and quarter notes.

3. This One Features A KEY SIGNATURE CHANGE

Musical notation for exercise 3, featuring a key signature change from three sharps (F#, C#, G#) to three flats (Bb, Eb, Ab) in a 4/4 time signature. The exercise consists of four staves. The first two staves are in the key of F# major, and the last two staves are in the key of Bb major. The key signature change is indicated by a double bar line with a key signature change symbol.

3. Smellin' Like Jingle Bellin' (articulation/expression)

Adagio ♩ = 60

These dots are staccato marks

The first system of music is in 4/4 time with a key signature of three flats. The upper staff begins with a dynamic marking of *f* and contains four measures of music with staccato dots above each note. The lower staff provides a bass accompaniment with eighth and quarter notes. The system concludes with four *sfz* markings above the notes in the upper staff.

The second system continues the piece. The upper staff starts with a dynamic marking of *mp* and includes an *accel.* marking. The lower staff continues with a similar accompaniment. The system ends with a key signature change to two flats, indicated by a double bar line and a key signature change.

Moderato ♩ = 80

These dashes are long note marks

The third system is in 4/4 time with a key signature of two sharps. The upper staff features long note marks (dashes) above the notes and a dynamic marking of *pp*. The lower staff continues with a bass accompaniment.

The fourth system continues the piece. The upper staff has a dynamic marking of *mp* and includes two *sfz* markings. The lower staff continues with a similar accompaniment. The system ends with a key signature change to one flat, indicated by a double bar line and a key signature change.

Allegro ♩ = 120

The fifth system is in 4/4 time with a key signature of one flat. The upper staff has a dynamic marking of *f* and the instruction *LEGATO*. The lower staff continues with a bass accompaniment.

The sixth system continues the piece. The upper staff has a dynamic marking of *ff*. The lower staff continues with a bass accompaniment. The system ends with a double bar line.

chapter eighteen

Position Playing On The Board

So far, this instructional method has concentrated on music notation within the first and second positions on the fretboard. This is because most notation concepts can be taught more simply and efficiently at those positions. However, moving to positions up the fretboard can provide other, more efficient ways of playing a line, melody, and/or part.

New Notes!

The next notes are G^b and $A^\#$. G^b has the same positions as $F^\#$.

$A^\#$ has the same positions as B^b .

However, **let's move further up the fretboard.**

A#

Cut Time

Cut time is $2/2$ (Φ). Two beats per measure, and the half-note has the value of one beat, which means that a quarter-note is one-half-beat, and a whole-note is worth 2 beats. This time signature is actually very common, especially among folk, country, punk, hard-core metal, and Latin/Brazilian genres.

6. When The Saints Go Marching In

$\text{♩} = 100$ *joyful*

The musical score is presented in four systems, each with a grand staff (treble and bass clefs). The key signature is three sharps (F#, C#, G#), and the time signature is cut time (2/2). The tempo is marked as quarter note = 100, and the mood is joyful. The melody in the treble clef consists of quarter notes and half notes, with a fermata over the final note. The bass clef accompaniment features a steady eighth-note bass line and chords.

chapter twenty

Wow! You Are Here!

B \sharp and F \flat are equivalent to C and E, respectively. If you are here, you are probably able to read music notation better than most professional guitar players. Congratulations...

New Notes (FOR THE LAST TIME)

B \sharp

F \flat

Remessage

♩ = 120

The musical score consists of six staves of music in the key of E major (three sharps) and 3/4 time. The tempo is marked as ♩ = 120. The notation includes eighth and quarter notes, rests, and bar lines. Chord diagrams are placed above the staves, indicating the fretting for various chords: E, B/D#, F#min, B7, Amaj7, G#min7, F#min7, B9, F#min7, C°7, G#min7, C#7(b9), F#m7(b5), B9, and E. A double bar line with a repeat sign is used to indicate the end of a section. A circled cross symbol (⊕) is placed above the staff at the end of the section. Below the fifth staff, the text "Go To The Coda If You Don't Feel Like Going To The Top" is written.

***Thankfully, guitar will always be
an Eighteenth Century instrument.***
